

ASU career launchpad

make your career soar

The danger of working outdoors.

Did you know that one in every 10 cancers diagnosed in men is caused by work?

Working outdoors in UV is one of the leading causes of workplace cancer.

But there are plenty of steps that you and your employer can take to **minimise your risks of exposure.**

Working in Heat

Online Training Courses

Course Presenters:

Cancer Council SunSmart educator Caoimhe Geraghty
Victorian Trades Hall Occupational Health and Safety experts Luke Bowman and Renata Musolino

This will be a live and interactive online webinar training course and can be accessed on a computer, iPad or phone. You will be able to view the presenters talking and you will have the opportunity to ask questions and receive answers.
